

## Gunsmithing Services

---

Here at Oregon Rifleworks, we perform a wide range of services when it comes to today's firearms. We can do just about anything on your AR-15, from pinning a muzzle device, to checking headspace once you've completed your build.

We work with other local shops to take in Cerakote jobs and pistol slides for milling. On any given day we have multiple certified Glock armorers on staff and can typically install Glock pistol sights same-day.

For questions, give us a call at the store during business hours, or shoot us an email at [info@oregonrifleworks.com](mailto:info@oregonrifleworks.com).
