

Gunsmithing Services

Here at Oregon Rifleworks, we perform a wide range of services when it comes to today's firearms. We can do just about anything on your AR-15, from pinning a muzzle device, to checking headspace once you've completed your build.

On any given day we have multiple certified Glock armorers on staff and can install Glock parts with quick turn-around times. We install Glock pistol sights same-day, and if you buy them here, we do it for free!

For questions, give us a call at the store during business hours, or shoot us an email at info@oregonrifleworks.com.
